FEATURES & BENEFITS

MHH

eco
smart series™

Condensing Units (Heat Pump)

ComfortStar **MHH Series** - High Efficiency Condensing Units warrant state-of-the-art technology, optimum cooling with long lasting reliability. Obtain the excellence in comfort when installed in single, multi-family and light commercial applications.

MHH Series contains R410a, a chlorine-free refrigerant, in accordance with the EPA's newest environmental guidelines. It increases system efficiency and has zero ozone depletion potential.

High and low pressure controls are standard on all MHH models to protect the compressor from refrigerant undercharge or overcharge.

Crankcase heater is standard on all MHH models to minimize refrigeration migration, and helps eliminate any start up noise or bearing "wash out" during cold weather.

One of the best Manufacturer's Limited Warranties in the industry is offered for added protection. Details are in our web site, we welcome you to contact our offices.

Standard features:

- R410a system
- High efficiency compressor
- Compact design for easy installation and transportation
- Ultra quiet
- Factory installed liquid line filter drier
- Pre-charged R410a good for 25' of lineset
- Brass liquid and suction service valves with sweat connections
- Contactor with lug connections
- Ground lug connection
- Terminal block provided for low voltage connections
- High and low pressure switch included
- Crankcase heater is included
- Copper Tube-Aluminum Fin Coil used on all models
- Suction Pressure Access Valve is included for measuring compressor suction pressure or charging the system during the heating cycle
- Unique defrost control, the defrost cycle is determined by both ambient temperature and coil temperature, three settings can be chosen to ensure the best performance.
- ARI certified and ETL listed

Cabinet features:

- Heavy gauge galvanized steel with gray powder paint finish
- Fully louvered removable coil guard to protect condenser surface
- Easy access to service valves and electrical connections
- Easy access to fan motor without disconnecting wires

- Removable top grille for easy access to fan motor and coil without disconnecting the wires

- Easy access to service valves and electrical connections

- All refrigerant connections are on the exterior of the unit, located close to the ground for a clean appearing installation

- Heavy gauge galvanized steel with gray powder paint finish meet 1000 hour salt spray testing
- Fully louvered coil guard to protect the inside coil from yard hazards and weather extremes
